

Rename MP3 Files Pro, v.4.36 Released

Friday, 23 March 2007

Was released Rename MP3 Files Pro, v.4.36

Differences, related to previous versions:

Changes related to previous versions:

- Appended possibility to send all processed files by E-Mail;
- Appended saving log to file and full log file control over context menu;

- Appended possibility to select, log messages of which types should be shown while processing, using template or custom settings set;

- Increased speed of web pages processing, created a separate processed web pages previewing window, that is automatically shown while web pages processing. Full description is presented in program help (press “Help” button to view);

- To start-up wizard appended step, on which user can easily select, how processed audio (music, speech) files are processed. Full description is presented in program help (press “Help” button to view);

- Increased processing stability, fixed some content analyzing problems.

Last product version may be purchased in our online store. All registered Rename MP3 Files Pro users can get it for free.
